Course Setter Notes:

* I gave credit on the Yellow course for those who missed 609 (8 on Yellow) as no one attempting on a Yellow course should miss a control. This controls was shared by the Orange, Red and Blue as well as Yellow. My recheck at pickup showed it correct, but map detail is soft here.

** Control 602 (3 on Green and 16 on Blue) was on the wrong root stock verified on pickup. The original root stock was so far gone I moved it to an adjacent root stock up the hill and then missed adjusting the master map. Standing at the correct one, where I move it to was in sight.

*** Fresh root stocks are not mapped as most of them occurred in the bad storms of 2011 and the map was last field checked and drafted in 2009
